WORK EXPERIENCE

Orro Group **Ayala, Makati | Sydney, Australia**
Full Stack Developer 3 years / *February 2023—Present*

- Built and maintained full-stack features for an enterprise CRM, monitoring, ticketing, and workflow automation platform using Laravel, JavaScript, MySQL, REST APIs, and Azure OpenAI
- Developed Azure OpenAI-powered chatbot and workflow automation features for internal support operations, reducing manual handling in day-to-day support tasks
- Integrated Jira, ServiceNow, and Freshservice via REST APIs to synchronize ticket data and automate workflows
- Built network automation tools using SSH and REST APIs for device backups, remote command execution, and device inspection, reducing manual operational work
- Integrated Cisco Meraki and Fortinet data into the platform to improve operational visibility and centralized monitoring
- Developed event-driven NOC automation workflows for alert ingestion, ticket creation, and escalation through webhooks

SKILLS

Languages & Frameworks: PHP, Laravel, JavaScript, TypeScript, React, Node.js, Express
Databases: MySQL, MongoDB
Tools & Technologies: Git, GitHub, GitLab, Docker, Postman, Vercel, Claude Code, OpenAI Codex
Frontend: HTML, CSS, Tailwind CSS, Bootstrap, shadcn/ui
Core: API Integrations, Real-time applications, Database design, Application Architecture, Automation workflows

EDUCATION

La Consolacion University Philippines **Malolos City, Bulacan**
Bachelor of Science in Information Technology, Cum Laude Graduated *2023*

PROJECTS

Real-Time Messaging Platform *React, Express.js, MongoDB, Tailwind CSS*
messenger-meta-clone.vercel.app

- Built a real-time messaging application supporting one-to-one and group chats with authentication
- Implemented WebSocket-based messaging for live chat updates, user presence, and chat state changes
- Designed database models for users, conversations, and messages to support consistent chat data handling
- Managed real-time React state for incoming messages, presence updates, and optimistic UI interactions
- Improved chat performance through pagination, lazy loading, and optimistic updates

Developer Profile and Resume Platform *React, TypeScript, Express.js, MySQL, Tailwind CSS*
profile-dev365.vercel.app

- Built a multi-user web application for developer portfolios with customizable public profile URLs
- Implemented secure authentication using JWT httpOnly cookies and protected API routes
- Added portfolio and resume versioning with draft, preview, and live states to support safe content publishing
- Built an ATS-friendly resume builder with structured editing, validation, and template switching
- Generated downloadable PDF resumes and integrated an AI assistant with real-time response streaming

Run Club Membership Platform *React, TypeScript, Laravel, SQL, Tailwind CSS*
mile365-runclub-landing.vercel.app

- Built a platform for a run club client with a landing page, membership system, and admin dashboard
